

MANUAL QA TEST REPORT

Instagram Mobile Application

Manual Functional Testing Report

Prepared By

Natlie Pinto

Testing Type

Manual Functional Testing

Platform

Android

Report Version

Version 1.0

Date

July 2026

Confidentiality

This report has been prepared solely for portfolio and learning purposes. All testing activities were performed on the publicly available version of the Instagram mobile application.

1. Project Overview

Application: Instagram Mobile Application

Prepared By: Natlie N. Pinto

Project Type: Manual QA Testing Project

Testing Types Covered:

- Functional Testing
- UI Testing
- Usability Testing
- Exploratory Testing

Objective:

To assess the functionality, user interface, and usability of the Instagram mobile application through manual testing.

2. Scope

The testing scope included the evaluation of the Login Module, Profile Module, Home Feed Module, Search Module, Post Creation Module, Chat Module, Notifications Module, Settings Module and Likes & Comments Functionality. Additionally, the application was assessed for navigation consistency, user interface quality, usability, and overall user experience through exploratory testing techniques.

3. Test Environment

Parameter	Details
Application	Instagram
Platform	Android
Testing Type	Manual Functional Testing
Device	Samsung Galaxy M32
Android Version	13
Network	Wi-Fi / Mobile Data

4. Test Scenarios

Login Module

- TS-001 Verify login with valid username, valid password.
- TS-002 Verify login with invalid username, invalid password.
- TS-003 Verify login with valid username, invalid password.
- TS-004 Verify login with invalid username, valid password.
- TS-005 Verify validation message is displayed for invalid email format.
- TS-006 Verify login with empty fields.
- TS-007 Verify password masking functionality.

Profile Module

- TS-008 Verify profile page opens successfully.
- TS-009 Verify profile picture can be changed.
- TS-010 Verify bio can be edited.
- TS-011 Verify username can be edited.
- TS-012 Verify profile information is updated successfully after editing.

Home Feed Module

- TS-013 Verify if posts are displayed.
- TS-014 Verify infinite scrolling.
- TS-015 Verify posts can be shared.
- TS-016 Verify if stories are visible.
- TS-017 Verify if refresh works correctly.

Search Module

- TS-018 Verify search results are displayed for matching keywords.
- TS-019 Verify search with valid keyword.
- TS-020 Verify search with special characters.
- TS-021 Verify recent searches functionality.
- TS-022 Verify if recent search can be deleted.

Post Creation Module

- TS-023 Verify image upload.

TS-024 Verify video upload.
TS-025 Verify if caption can be added.
TS-026 Verify if song can be added.
TS-027 Verify post deletion.
TS-028 Verify post is successfully published.

Chat Module

TS-029 Verify sending messages.
TS-030 Verify receiving messages.
TS-031 Verify sending images.
TS-032 Verify sending videos.
TS-033 Verify deleting messages.

Notifications Module

TS-034 Verify notification appears on lock screen.
TS-035 Verify notification is displayed correctly in dark mode.
TS-036 Verify notification opens the app correctly when tapped from the notification panel.
TS-037 Verify multiple notifications received simultaneously are displayed correctly.

Settings Module

TS-038 Verify if logout works.
TS-039 Verify if password change works.
TS-040 Verify if account status can be changed.
TS-041 Verify if a user can switch from professional to personal account efficiently.
TS-042 Verify if language change works.

Likes & Comments Functionality

TS-043 Verify if user can like a post.
TS-044 Verify if user can remove a like from a post.
TS-045 Verify if user can add a comment.
TS-046 Verify if user can delete a comment.

5. Test Cases

Test case ID	Test Scenario	Preconditions	Steps	Expected Results	Actual Results	Status
TC-001	Verify login with valid username and password	User account exists	1. Open Instagram 2. Enter valid username 3. Enter valid password 4. Tap Login	User is redirected to Home Screen	User logs in successfully	Pass
TC-002	Verify login with invalid username, invalid password.	User account exists	1. Open Instagram 2. Enter invalid username 3. Enter invalid password 4. Tap Login	Message shown to enter correct credentials	User cannot login	Pass
TC-003	Verify login with valid username, invalid password	User account exists	1. Open Instagram 2. Enter valid username 3. Enter invalid password 4. Tap Login	Message shown to enter correct credentials	User cannot login	Pass
TC-004	Verify login with invalid username, valid password	User account exists	1. Open Instagram 2. Enter invalid username 3. Enter valid password 4. Tap Login	Message shown to enter correct credentials	User cannot login	Pass
TC-005	Verify validation message is displayed for invalid email format	User account exists	1. Open Instagram 2. Enter invalid email 3. Tap login	Message shown to enter valid email	User cannot login	Pass
TC-006	Verify login with empty fields	User account exists	1. Open Instagram 2. Don't enter anything 3. Tap on login	Message shown to enter credentials	User cannot login	Pass

TC-007	Verify password masking functionality	User account exists	1. Open Instagram 2. Navigate to Login page 3. Enter password in Password field	Entered characters must be displayed as dots/bullets (*) or hidden symbols instead of plain text	Entered characters displayed as dots/bullets instead of plain text	Pass
TC-008	Verify profile page open successfully	User is logged in	1. Open Instagram 2. Click on profile page	Profile page must open	Profile page opened	Pass
TC-009	Verify profile picture can be changed	User is logged in	1. Open app 2. Click on profile page 3. Click on edit profile picture	Option must be provided to change the profile picture	Options provided to change profile picture	Pass
TC-010	Verify if bio can be edited	User is logged in	1. Open Instagram 2. Click on profile page 3. Click on edit bio	User must be able to edit the bio	User can edit bio	Pass
TC-011	Verify if username can be edited	User is logged in	1. Open Instagram 2. Click on profile page 3. Click on edit profile 4. Click on username	The option to change username must be provided	Option to change username is provided	Pass
TC-012	Verify if profile information is updated successfully after editing	User is logged in	1. Open Instagram 2. Click on profile page 3. Click on edit profile and edit its content	Changes must be saved	Changes are saved	Pass
TC-013	Verify posts are displayed	User is logged in	1. Open Instagram 2. Tap on the	The posts must be visible	Posts are visible	Pass

			home icon			
TC-014	Verify infinite scrolling	User is logged in	1. Open Instagram 2. Tap on the home icon 3. Keep on scrolling	Infinite scrolling must exist	Infinite scrolling exists	Pass
TC-015	Verify post can be shared	User is logged in	1. Open Instagram 2. Tap on the home icon 3. Tap on share post	Post must be shared successfully	Post shared successfully	Pass
TC-016	Verify if stories are visible	User is logged in	1. Open Instagram 2. Tap on the home icon 3. Tap on any story	Story must be visible	Story is visible	Pass
TC-017	Verify refresh correctly	User is logged in	1. Open Instagram 2. Tap on the home icon 3. Refresh screen	Screen must refresh and reload correctly	Screen refreshed and reloaded successfully	Pass
TC-018	Verify search results are displayed for matching keywords	User is logged in	1. Open Instagram 2. Tap on the search bar, search for certain keywords	Matching results to keywords must be shown	Matching results to the keywords shown	Pass
TC-019	Verify search with valid keywords	User is logged in	1. Open Instagram. 2. Tap the Search icon. 3. Enter the keyword "watercolor drawing". 4. Observe the search results	Relevant search results should be displayed, and the user should be able to access all applicable result categories	Search results displayed only account names. Options to view Reels and Posts were not available.	Fail

			and available result categories.	such as Accounts, Reels, Posts, Hashtags, etc.		
TC-020	Verify search with special characters	User is logged in	1. Open Instagram 2. Tap Search 3. Enter "@#\$\$%^&*" in search bar	Application must handle the input without crashing and display appropriate results or a "No results found" message	Application handled the input without crashing and displayed "No results found" message	Pass
TC-021	Verify recent searches functionality	User has performed previous searches	1. Open Instagram 2. Tap Search bar 3. Observe recent search section	Previously searched keywords/accounts must be displayed in the recent searches list	Previously searched keywords/accounts are displayed in the recent searches list	Pass
TC-022	Verify if recent search can be deleted	User has performed previous searches	1. Open Instagram 2. Tap Search bar 3. Tap on "x" to delete recent search	Recent search must be deleted	Recent search is deleted	Pass
TC-023	Verify image upload	User is logged in	1. Open Instagram 2. Tap on "+" icon to upload image	Image must be uploaded successfully	Image uploaded successfully	Pass
TC-024	Verify video upload	User is logged in	1. Open Instagram 2. Tap on "+" icon to upload video	Video must be uploaded successfully	video uploaded successfully	Pass
TC-025	Verify if caption can be added	User is logged in and has	1. Open Instagram 2. Tap Create	Caption must be added successfully	Caption is added successfully	Pass

		selected an image for upload	Post 3. Select an image 4. Proceed to caption screen 5. Enter a caption 6. Publish post			
TC-026	Verify if song can be added	User is logged in and has selected an image for upload	1. Open Instagram 2. Tap Create Post 3. Select an image 4. Proceed to song screen 5. Select a song 6. Publish post	Song must be added successfully	Song added successfully	Pass
TC-027	Verify post deletion	User is logged in and has published a post	1. Open Instagram 2. Navigate to profile section 3. Click on delete post	Post must be deleted successfully	Post deleted successfully	Pass
TC-028	Verify post is successfully published	User is logged in and has selected an image/video, added required details, and reached the post publishing screen.	1. Open Instagram. 2. Navigate to the post creation screen. 3. Select an image/video. 4. Add caption. 5. Tap Share/Publish	Post must be uploaded successfully	Post uploaded successfully	Pass
TC-029	Verify sending messages	User is logged in	1. Open Instagram. 2. Navigate to messages 3. Open any chat and send	Message must be sent successfully	Message sent successfully	Pass

			"Hi"			
TC-030	Verify receiving messages	User is logged in and has an active chat conversation with another user.	1. Open Instagram. 2. Navigate to messages. 3. Using another account, send a message to the test account.	Message must be received correctly	Message received correctly	Pass
TC-031	Verify sending images	User is logged in	1. Open Instagram. 2. Navigate to messages 3. Open any chat and send an image	Image must be sent correctly	Image sent correctly	Pass
TC-032	Verify sending videos	User is logged in	1. Open Instagram. 2. Navigate to messages 3. Open any chat and send a video	Video must be sent correctly	Video send correctly	Pass
TC-033	Verify deleting messages	User is logged in	1. Open Instagram. 2. Navigate to the chat page 3. Open any chat and click on "unsend"	Message must be deleted entirely	Message deleted entirely	Pass
TC-034	Verify if notification appears on lock screen	User is logged in and the device is locked	1. Open Instagram on another device 2. Send a message to the test account	Notification must appear on the lock screen	Notification appears on the lock screen	Pass
TC-035	Verify if notification is displayed correctly in	User is logged in with dark mode on the	1. Open Instagram. 2. Navigate to notifications	Notification must be displayed in dark mode	Notification displayed in dark mode	Pass

	dark mode	device				
TC-036	Verify if notification opens the app correctly when tapped from the notification panel.	User is logged in and has a notification in the notification panel	1. Open Instagram. 2. Open the notification panel and click on the existing notification	App must open correctly after tapping on the notification from notification panel	App opened successfully	Pass
TC-037	Verify multiple notifications received simultaneously are displayed correctly	User is logged in and simultaneous messages are sent from another account	1. Open Instagram. 2. Navigate to notifications	Multiple notifications must be displayed correctly	Multiple notifications are displayed correctly	Pass
TC-038	Verify if logout works	User is logged in	1. Open Instagram. 2. Go to settings 3. Tap on logout	Pop up must be displayed asking re - confirmation about logout	Pop up is displayed asking re - confirmation about logout	Pass
TC-039	Verify if password change	User is logged in	1. Open Instagram. 2. Go to settings 3. Navigate to Accounts center 4. Click on password and security 5. Navigate to change password	User is required to select the account then type in the current password then add the new password and re type the new password	User is redirected to select the account then type in the current password then add the new password and re type the new password	Pass
TC-040	Verify if account type can be changed	User is logged in	1. Open Instagram. 2. Go to Profile. 3. Open	Account should successfully switch to Professional	Account switched successfully.	Pass

			Settings and Privacy. 4. Select Account Type and Tools. 5. Choose Switch Account Type. 6. Select Professional Account. 7. Complete the setup process.	Account.		
TC-041	Verify if a user can switch from professional account to personal account efficiently	User is logged in and currently using a Professional Account.	1. Open Instagram. 2. Navigate to Profile. 3. Open Settings and Privacy. 4. Select Account Type and Tools. 5. Tap Switch Account Type. 6. Select Switch to Personal Account. 7. Confirm the action.	Account should be successfully switched to a Personal Account without data loss.	Account switched successfully and all profile data remained intact.	Pass
TC-042	Verify if language change works	User is logged in	1. Open Instagram. 2. Navigate to Profile. 3. Tap on menu 4. Navigate to language 5. Select desired language	The page must get automatically refreshed and the selected language must be displayed	The page gets refreshed and the selected language is displayed	Pass

TC-043	Verify if a user can like a reel	User is logged in and has a opened a reel	1. Open instagram 2. Click on any reel 3. Tap on the heart button	The reel must get liked and the heart button gets colorful	The heart button gets colorful, indicating it has been liked	Pass
TC-044	Verify if a user can remove a like from a reel	User is logged in and has a opened a reel	1. Open instagram 2. Click on any reel 3. Tap on the like button 4. Tap again on the like button to unlike it	The like must be removed successfully and the like button should return to its unliked state.	The like is removed successfully	Pass
TC-045	Verify if a user can add a comment	User is logged in and has a opened a reel	1. Open instagram 2. Click on any reel 3. Tap on the comment button and add a comment	The comment must be added successfully to the reel	The comment gets successfully added to the reel	Pass
TC-046	Verify if a user can delete a comment	User is logged in and has a opened a reel	1. Open instagram 2. Click on any reel 3. Tap on the comment button and add a comment 4. Press hold the comment and then tap on delete	The comment must get deleted successfully	The comment gets deleted successfully	Pass

6. UI Findings

ID	Observation	Impact	Severity
----	-------------	--------	----------

UI-001	The bottom navigation bar remains consistent across all major screens of the application.	Provides a familiar and predictable navigation experience for users.	Low
UI-002	Icons and labels are visually clear and easy to identify.	Improves usability and reduces user confusion.	Low
UI-003	Profile images maintain the correct aspect ratio and do not appear stretched or distorted.	Provides a visually appealing and consistent user experience.	Low
UI-004	Dark mode maintains good contrast between background and text elements.	Enhances readability and improves accessibility in low-light environments.	Low
UI-005	The search interface is clean and provides quick access to recent searches.	Improves efficiency and makes frequently searched content easier to access.	Low
UI-006	Long usernames or display names may be truncated on smaller screen sizes.	May affect readability for users with longer usernames or display names.	Low
UI-007	Some notification messages require additional taps to view complete details.	May slightly reduce efficiency when reviewing notification content.	Low
UI-008	Certain profile settings are located several levels deep within the Settings menu.	Users may require additional navigation to access frequently used settings.	Low

7. Usability Findings

ID	Observation	Impact	Severity
US-001	The application provides a simple and intuitive navigation flow across major features.	Enables users to complete common tasks with minimal effort.	Low

US-002	Restaurant search returns relevant results quickly for commonly searched keywords.	Improves the overall search experience and reduces user effort.	Low
US-003	Food categories and filters help users discover restaurants and dishes efficiently.	Enhances usability by simplifying the search and selection process.	Low
US-004	The checkout process is straightforward, with clear order and payment details.	Reduces the likelihood of user confusion during order placement.	Low
US-005	Live order tracking provides users with real-time updates on their order status.	Increases transparency and improves the delivery experience.	Low
US-006	Notifications keep users informed about important order events throughout the delivery process.	Improves user engagement and keeps users updated without requiring them to open the application.	Low
US-007	The application allows users to switch between saved delivery addresses easily.	Provides flexibility for users ordering to different locations.	Low
US-008	Profile and account settings are organized logically, making account management straightforward.	Improves accessibility of frequently used account-related options.	Low

8. Exploratory Testing

ID	Test Performed	Expected Behavior	Observed Behavior	Status
EX-001	Rapidly tapped the Like button on a reel multiple times.	The application should handle repeated taps without crashing or displaying inconsistent like counts.	The application handled repeated taps correctly and remained responsive.	Pass
EX-002	Rotated the device while viewing a profile page.	The profile page should remain visible, and the layout should adjust correctly without UI distortion.	The profile page remained properly aligned, and no layout issues were observed.	Pass
EX-003	Switched between Instagram and another application repeatedly while uploading a post.	The upload process should continue or resume without data loss.	The upload resumed successfully after returning to the application.	Pass
EX-004	Disabled internet connectivity while browsing the Home feed.	The application should display an appropriate network error message without crashing.	A loading indicator appeared, followed by a network error message.	Pass
EX-005	Entered special characters and random symbols into the search field.	The application should process the input gracefully without crashing or becoming unresponsive.	The application remained stable and displayed the appropriate search results.	Pass

8.1. Additional Observation

Observation ID: OBS-001

Observation:

While reviewing the Professional Dashboard across multiple devices, the same analytics metric was displayed using different suffixes. On some devices the value appeared as **9.3K**, while on others it appeared as **9.3T**.

Impact:

Inconsistent metric formatting may confuse users and lead to incorrect interpretation of account analytics.

Recommendation:

Verify metric formatting logic across supported devices and ensure consistent representation of analytics values.

9. Bug Reports

Bug ID: BUG-001

Title:

Search results do not display Reels and Posts categories for valid keyword searches

Description:

When searching for the keyword "watercolor drawing", Instagram displays account-related results but does not provide options to view Reels or Posts related to the search term.

Steps to Reproduce:

1. Open Instagram.
2. Navigate to the Search section.
3. Enter the keyword "watercolor drawing".
4. Observe the available search result categories.

Expected Result:

The application should display all relevant result categories such as Accounts, Reels, Posts, Hashtags, and Places where applicable.

Actual Result:

Only account-related results are displayed. Reels and Posts categories are not available.

Severity:

Medium

Priority:

Medium

Status:

New

Environment:

Instagram Mobile Application

Bug ID: BUG-002

Title:

Professional Dashboard displays incorrect metric suffix ("T" instead of "K")

Description:

The Professional Dashboard displays analytics values using inconsistent suffixes across devices. The same metric is shown as **9.3K** on some devices and **9.3T** on others, despite representing values in thousands.

Steps to Reproduce:

1. Open Instagram using a Professional Account.
2. Navigate to the Professional Dashboard.
3. View analytics metrics on Device A.
4. Compare the same metric on Device B.
5. Observe the displayed suffix.

Expected Result:

Metrics representing thousands should be displayed consistently using the suffix K.

Actual Result:

Some devices display the value using the suffix **T** instead of **K**.

10. Project Summary

Test Execution Summary	Count
Total Test Scenarios	46
Total Test Cases	46
Executed Test Cases	46
Passed	45
Failed	1
UI Findings	8
Usability Findings	5
Exploratory Tests Performed	5
Bugs Reported	1

11. Tools Used

Tool	Purpose
Android Smartphone	Executing and validating test scenarios on the mobile application
Instagram Mobile Application	Application Under Test (AUT)
Google Docs	Preparing the QA test report and documentation
Screenshot Tool	Capturing screenshots for documentation and evidence

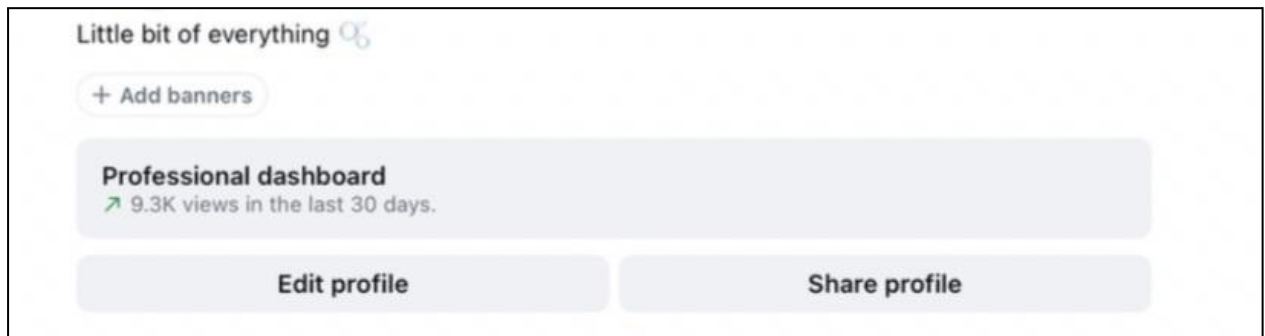

12. Conclusion

The Instagram mobile application was tested using functional, UI, usability, and exploratory testing techniques. The major features of the application, including login, search, profile management, post creation, messaging, notifications, and settings, functioned as expected during testing.

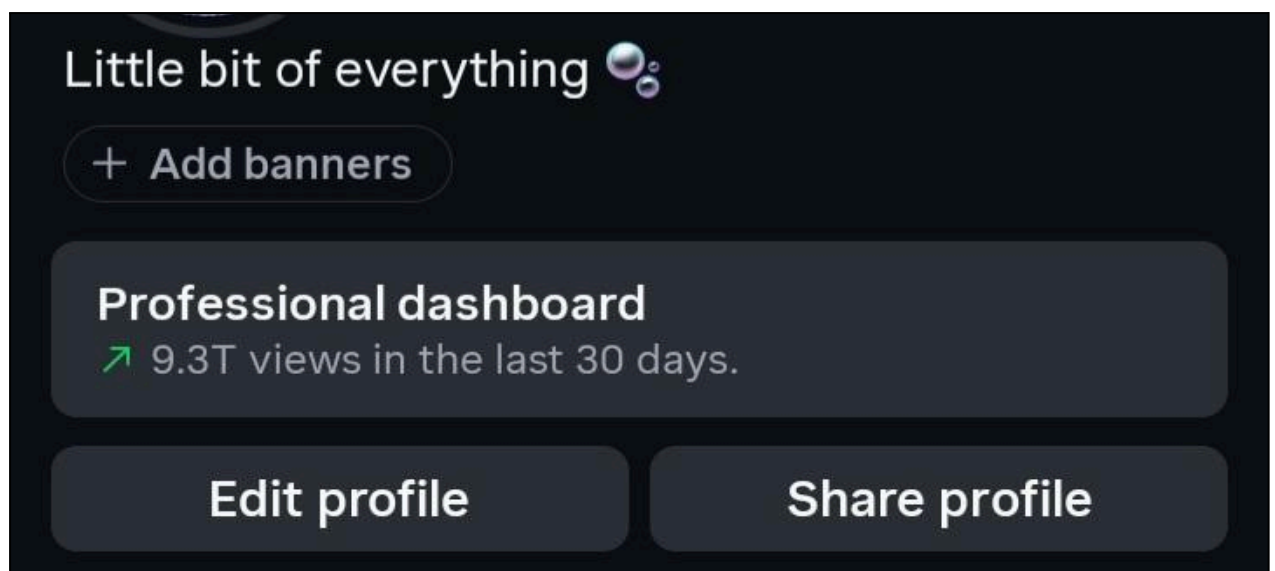

One issue related to search result categorization was identified and documented as a bug report. Apart from this observation, the application provided a consistent user interface and a smooth user experience.

Overall, the application performed well across the tested modules.
